A Message From the Superintendent

I want to thank you for taking the time to view our Quality Profile. This is a special year for Fairport Harbor Schools. I am very proud of the teachers, staff members and the families that choose to call this school district their own. Together we are able to accomplish great things. For the first time, McKinley Elementary will begin the year as a fully-accredited International Baccalaureate World School. This is a fantastic accomplishment for our school and an opportunity to truly transform learning for our students. With curriculum designed to help them explore, understand, and engage in real world issues, students will find learning more purposeful and long lasting than ever before. When students leave McKinley, they will be well-prepared for the ever-expanding Personalized Learning environment of Harding and the many opportunities it affords.

The class of 2020 are in their senior year! They are the first group of students to have full-day kindergarten and the ensuing Early College acceleration that has become part of our culture. Their progress has established a new standard for this district every step of the way. The 2020 vision was developed around them and when they graduate, they will be the first graduating class in the history of Fairport Harbor to have every member of the class acquire college credit or career credentials prior to their high school graduation. Their lofty accomplishments will serve as a testament to what can be achieved when a school district places its focus on helping students realize and ultimately become what they are able to become.

Domenic Paolo, PhD

Fish Fry November 5, 2018

What is a Quality Profile?

This Quality Profile was developed in order to give the Village of Fairport Harbor an opportunity to see some of the great things occurring in our schools that may not be reflected on a state report card. As you look through the pages, I think you will see that we are preparing our students for success in college, career and life by creating learning opportunities founded in inquiry and tailored to individual student talents and interests.

That is why Fairport students are *Learning Today, Leading Tomorrow*.

Profile of a Graduate

Fairport Harbor Exempted Village Schools

Learning Today

Collaboration

Graduates will demonstrate an ability to express themselves confidently and creatively using situational awareness, active listening, and collaboration to reach consensus.

Perspective

Graduates will reflect an open-minded, balanced awareness of multiple perspectives, by acting with empathy, compassion and respect.

Critical Thinking

Graduates will be innovative, lifelong learners by nurturing their curiosity and utilizing problem-solving skills to make informed decisions and achieve

Adaptability

Graduates will be courageous, resourceful and resilient when faced with challenges and opportunities.

Leading Tomorrow

The Fairport Harbor Profile of a Graduate seeks to energize our community of educators, students and parents and stakeholders around a 21st century definition of student success. The Fairport Harbor Schools Profile of a Graduate was developed with input from the community, teachers, parents, students and school board members. It is used to help design our work in personalizing of the learning experiences we provide to our students. The Profile of a Graduate will be a guiding document for future professional development work, grant writing and program design.

The Arts

VFW Patriotic Art Contest Winner-
1st place Maarika Haller
2nd place Kiana Dambolena

"I've known, from a very young age, that creative learning can make every aspect of life more interesting and therefore better! I developed a life-long commitment to sharing, teaching, and encouraging this interest and passion in my students and adults as well."

McKinley Elementary International Baccalaureate World School!

McKinley Elementary is the first and only *International Baccalaureate Primary Years Program* in the tri-county area!

What is International Baccalaureate?

Globally focused

Emphasizes creative problem-solving, hands-on projects, inquiry-based learning and community action.

Six trans-disciplinary themes provide the framework for exploration and construction of knowledge.

Students develop an understanding of concepts, acquire essential skills and knowledge, develop particular attitudes and learn to take socially responsible action.

What is Inquiry?

Inquiry learning requires teachers who are facilitators and not distributors of knowledge. Learning outcomes are transparent and accessible for the entire learning community including parents, students, and other teachers. Learning is constructed in a way that is differentiated or that is specific to the needs of each learner within the classroom. Teachers work closely with their colleagues to constantly reflect, review and revise the program and collaboration is an expected part of the community.

Why is the IB Primary Years Program a good fit for Fairport Harbor Schools?

The rigorous IB curriculum gives McKinley Elementary students a competitive advantage by solidifying a strong foundation for success in the Personalized Learning, Early College and Career Readiness programs at the middle school and high school. The mission of the International Baccalaureate fits with the mission of the Fairport Harbor Schools by cultivating high-level learning for every student. This is achieved through the development of collaborative, competent communicators who are civic-minded. Students in the Primary Years Program are equipped with creative problem-solving skills that will allow them to continue their education as innovative learners.

Harding Early College High School is ensuring that every student receives the challenge and support necessary to ensure college credit or career credentials for all graduates.

Early College and Career Acceleration

- Middle school instruction and supports are designed to accelerate students through high school curriculum and on to college and career training as early as possible.
- The top 20 sophomores and top 20 juniors are taken on a free tour of Ohio colleges. Students visited University of Toledo, Tiffin, Ohio State University, Findlay, and Mount Union this past year on our annual "20/20 Trip".
- Students begin technical training at Auburn Career Center as early as their sophomore year.

Personalized Learning Continues to Grow!

Fairport Harbor Schools has been awarded an Ohio School Improvement grant to expand Personalized Learning throughout Harding High School.

The areas of focus for the 2019-2020 school year includes the new 8th grade personalized learning cohort and the Design Lab. In these learning structures, students exercise voice and choice in their learning and co-create personal academic profiles and learning plans focused on student interests, aspirations, and learning challenges.

The core components of personalized learning are:

- The **learner profile** includes: demographic data, academic status, learning-related skill set, and learning drivers. for each student.
- **Standards-based progress**, is when standards are identified and used to provide clear targets for learning and expected outcomes. Student progress is based on mastery of standards, not seat time.
- **Student Mentoring**, allows students to co design their learning with their teachers.

American Association of School Administrators (AASA) National Personalized Learning Cohort

The Fairport Harbor Schools are proud members of the American Association of School Administrators, National Cohort on Personalized Learning! This group is working to study the best practices in personalized learning around the country. FHEVS has also been awarded an Ohio School Improvement Grant to expand personalized learning throughout Harding High School.
