Fairport Harbor Exempted Village School District

Learning Today Leading Tomorrow

Five-Year Forecast Assumptions FY23-27 (Summary) Submitted May 2023

The District:

Fairport Harbor Schools is a district grounded firmly in rich history and tradition. As a school district that has been educating young minds since the first brick school building was built in 1876, Fairport has had a significant place in the history of Lake County, Ohio.

Today, the schools of Fairport Harbor look much different than they did in the 1870s. The educational program is structured to cultivate the whole child and to meet the needs of our diverse population of learners. Their small size allows them to provide students with a personalized education similar to that of a private school atmosphere. The close-knit family experience is nurtured through the personalized teacher's attention that all students receive. The teachers are masterful, reflective, professionals that are committed to providing an exceptional education to every child. They are committed to developing a collaborative educational experience that meets the needs of all students and develops young minds with preparedness for the 21st-century workforce

Overview:

This financial forecast for the general operating fund is prepared according to the requirements legislated by HB412 and the district has prepared financial forecasts as a routine for many years and believes it is a valuable management tool. This forecast is an estimate of the most probable financial position, results of operations and changes in financial position for the five-year period. "Most probable" means that the assumptions have been evaluated by management and that the forecast is based upon management's judgment of the most likely set of conditions and its most likely course of action. "Most probable" is not used in a mathematical or statistical sense.

Summary Notes:

Revenue:

 Lake County completed the sexennial tax value updates in 2018. The triennial update for Lake County was completed in 2021. Therefore, the next full reappraisal will be in 2024. The overall total district property assessed valuation for calendar year 2022 – collection 2023 is \$70,070,230. The valuation reflects the general property tax decrease that the district realized due to the November 8, 2022 voter approval of a substitute levy, which combined the two current emergency levies. Currently, this is the equivalent of a 1.5 mill reduction. Based on certification of the Lake County Auditor, projections are calculated based upon 94% of the total property valuation.

- HB59 removed property rollback reimbursement on any new levies approved in November 2013 and thereafter. However, local tax collections will offset on any new levies. Please note, all current rollback and homestead credits remain intact with the recent substitute levy approval.
- Foundation levels in FY2023 are projected at the current funding levels provided by the Ohio Department of Education and the Office of Budget and Management. Also, shown in this line item are casino revenue, adjustments/ transfers and the workforce incentive & credential reimbursement.
- Governor DeWine's Fiscal Year 2024-2025 Executive Budget was released January 31, 2023. Upon its passage in July 2023, we would expect to see years three and four of the six-year phase-in of the Fair School Funding Plan. The Fair School Funding Plan is a system for funding schools that can be broken down into three main components: the base cost; the state and local share; and additional targeted assistance/categorical aid.
- The state funding levels for FY2022-FY2023 has been projected pursuant to the May funding settlement from the Ohio Department of Education. No increase is projected for FY2024-FY2027. Any increases will be incorporated into the fall forecast once the biennial budget has been vetted, approved and signed by the Governor.
- This new funding formula implements "direct" funding for Community Schools, STEM Schools, Scholarship programs and Open Enrollment which means the funds are sent to where the students are educated vs. where they reside. This change will affect both the revenue and expenditures for school districts.
- Additionally, the budget bill moved the Student Wellness funding from fund 467 into the general fund. It is deemed restricted funding and is shown in Line 1.045 of the forecast.
- All other revenues consist of rental income, miscellaneous receipts but largely interest income. After years of dismal interest rates, we have realized a substantial increase in our interest income when compared to FY2022 [\$156,323 vs \$10,085.31]. Based on financial analysts, interest rates will continue to rise in 2023 before falling back down to 4.25% in 2024 and 3.25% in 2025. FY2024 has been projected a conservative 3.5%.
- As stated previously, open enrollment is being funded differently under the new state funding model and; therefore, is now reflected in Line 1.040.

Expense:

- In fall, 2021, the Fairport Harbor Education Association and the Fairport Harbor Board of Education ratified a three (3) year contract that expires June 30, 2024.
 The terms and conditions as it relates to salaries and benefits has been projected for the length of the contract.
- Wages reduced for ESSER II (\$359,108 one time decrease in expenses FY2021 only)
- FY2023 estimates reflect an increase in salaries and benefits are 13.6% and 4.8% respectively. This a result of the negotiated movement in healthcare plans and the resulting one-time stipend for making that move. FY2023-FY2024 are projected according to the terms of the negotiated agreement. The remaining years assume a 2% increase due to step and educational advancement.
- FY2024 reflects staff members currently paid from ARP ESSER funds back to the general fund.
- In March 2021, the Lake County School Healthcare Council approved that the rate setting period coincide with the Benefit Period of January 1st to December 31st, effective January 1, 2022. Therefore, going forward we will realize a mid-year premium rate change. For FY2023, estimates reflect a 3.5% increase in premiums from July-December and an 8.5% increase from January-June. The second half of FY2024 and all remaining years are projected with a conservative 10% increase based on industry and inflationary trends.
- In April 2023, Lake County School Council approved a fourth healthcare premium holiday. The forecast reflects the reduction in July 2023.
- Purchased Services is reflecting a decrease from the three (3) year average due
 to the *Fair School Funding Plan* that funds students where they are educated vs.
 where they reside. This means that open enrollment-out and community school
 students are no longer being deducted from the monthly funding settlements.
- For FY2023, <u>Purchased Services</u> has been projected with a 30.4% increase when compared to FY2022. I would attribute this to high inflationary increases and supply chain issues. The remaining years are reflecting a 5% inflationary increase.
- For FY2023, <u>Supplies</u> has been projected with a 22.3% increase when compared to FY2022. I would attribute this to high inflationary increases and supply chain issues. Additionally, FY2024-FY2027 reflect a 5% inflationary increase.
- For FY2023, <u>Capital Outlay</u> has been projected with an 56% increase compared to FY2022 but remains significantly below expenditures when compared to

FY2020. FY2024-FY2027 reflect the average of FY2019-FY2022 plus a 5% inflationary increase.

- Other objects include expenditures such as liability insurance, county auditor fees, state auditor fees, membership dues and other miscellaneous expenditures.
- Advances are paid out in the current fiscal year to avoid any deficit fund balances at year-end. The advances are returned the following fiscal year. The result is a net of zero. (i.e.: refer to line 5.02 in fiscal year 2022 and line 2.05 in fiscal year 2023)
- Operating Transfers-Out are estimates for the annual Capital Improvement allocation as well as any Student Activity and/or Athletic deficit balances at yearend.
- It cannot be emphasized enough the effect student enrollment will have on district allocations of state funding under the new model. Unfortunately, the district cannot react as quickly to change staffing levels mid-year without a major disruption to the educational process. The forecast will continue to be re-evaluated once the actual level of state revenue for the year is known. The Board has committed to 60 days of unencumbered expenditures at year end. Based on the current projections, this occurs 5 out of the 5 years. As always, the district is dedicated to maintain student programming and provide educational, social and emotional support to students. It is important to keep in mind, that it is a living document and is constantly changing. It is a snapshot of the district's financial condition at a point in time based on assumptions.
